

The HelloYeti solution integrates the reception of visitors at your company with Microsoft Teams. It is a Video doorbell (Intercom) with a nice 7" color touchscreen in a sturdy outdoor device.

HelloYeti shows your company logo/video, as well as one or more buttons on the screen to allow Visitors to contact Teams users in the company by (video)call.

Supported features:

- Calls can go to one user or a group of users. Calls will follow Teams call-flow logic
- Only a standard Teams client is needed to answer calls, no extra software
- Door can be opened remotely for the Visitor from the Teams client
- Fully customizable by you: logo/video, button(s), label(s), call destination(s), colors, door-opening command, ...
- Optionally unlock the door by entering a PIN code on the device

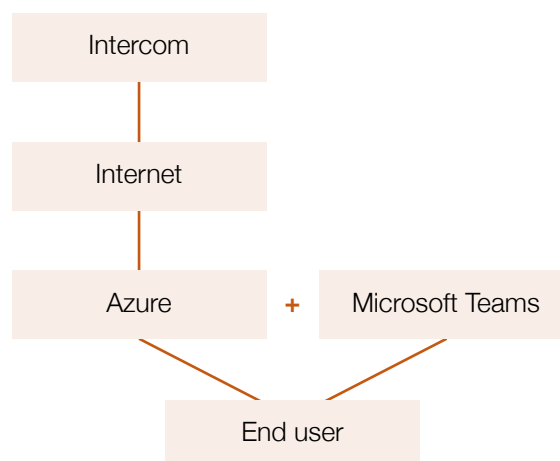

Licensing

One basic Teams account is needed if the calls from the Intercom need to appear as coming from an internal account.

Technical

- IP65 Waterproof & anti glare tempered glass
- On-wall or Flush mounting
- **No gateway or server-software needed**
